T LEVEL IN DIGITAL BUSINESS SERVICES

↑ ABOUT T LEVELS

T Levels are new courses that follow GCSEs and are equivalent to 3 A Levels. They've been co-created by the industry you want to be a part of, so you can gain the knowledge and skills you need to leap ahead of the crowd and into your desired career.

↑ ABOUT THE COURSE

The core element of a T Level in Digital Business Services will boost your knowledge in a range of topics such as programming, coding, the use of data and the different platforms of delivery in the digital industry. It's a cutting-edge subject, so you'll also learn about the potential security risks that organisations can face and how to analyse problems and identify solutions through computer programs.

You'll then move on to study the role of data technician in more detail, so you can build up the skills you need for your future job. You'll learn about sourcing, organising and formatting data, as well as how to interpret and communicate results. You'll also develop the skills needed for data analysis and the different ways to manipulate data.

Then you'll be able to put everything you learn into practice, with a substantial industry placement of around 45 days. Giving you an amazing opportunity to work with an employer while you study, such as an IT company or department, and gain invaluable experience as well as key skills that employers are looking for.

↑ WHERE COULD THE COURSE TAKE ME?

Following a T Level, you could progress straight into a skilled profession or continue your studies with a degree or higher apprenticeship. Career options might include becoming an IT Solutions Technician or Digital Marketer – speak to your careers adviser to find out more.

↑ WHAT'S NEXT?
