T LEVEL IN ONSITE CONSTRUCTION

↑ ABOUT T LEVELS

T Levels are new courses that follow GCSEs and are equivalent to 3 A Levels. They've been co-created by the industry you want to be a part of, so you can gain the knowledge and skills you need to leap ahead of the crowd and into your desired career.

↑ ABOUT THE COURSE

The core element of a T Level in Onsite Construction will boost your knowledge in a range of topics such as design principles, project management and health and safety. You'll also learn about the commercial side of construction, including stakeholder management, business structures and entrepreneurship. And as the construction industry is always evolving, you'll dive into the world of digital technology, innovation and sustainability, to understand how the industry will be shaped in the future.

You'll then choose a specialism designed to support your interests, so you can get deeper into your chosen subject and build up the skills you need for your future job. You can choose from specialist modules in either Carpentry and Joinery, Plastering, Bricklaying or Painting and Decorating.

Then you'll be able to put everything you learn into practice, with a substantial industry placement of around 45 days. Giving you an amazing opportunity to work with an employer while you study, such as a construction or building company, and gain invaluable experience as well as key skills that employers are looking for.

↑ WHERE COULD THE COURSE TAKE ME?

Following a T Level, you could progress straight into a skilled profession or continue your studies with a degree or higher apprenticeship. Career options might include becoming an advanced site carpenter or joiner, or a construction assembly and installation operative – speak to your careers adviser to find out more.
