

ALGEBRA WORDS

SIMPLIFY - Make smaller, easier to read, less symbols/numbers

SOLVE - Find the value of the letter, there could be more than one answer

FACTORISE - put into brackets; single or double

EXPAND - remove the brackets by multiplying, use the grid method

SUBSTITUTE - replace the letter with a number

EVALUATE - Find the value of, work out the answer

PROVE - use algebra to show something is true, don't use examples, write a concluding sentence

ITERATE - Repeat a process, using a formula, to find values $x_1, x_2, x_3 \dots$
